<b>Type of subject</b> Basic	<b>Temporality</b> First semester
<b>Code SIES</b> GADEMP01-1-004	<b>Course</b> First

### Changes in the contains

WITHOUT CHANGES

### Changes in the methodology and workplan

WITHOUT CHANGES

### Changes in the assessment

With the priority objective that no student miss a course as a consequence of this crisis, the extraordinary exams of this subject will consist of a face-to-face test that will take place when the state of alarm is raised and the appropriate sanitary conditions are given to carry it out (always in the official date fixed by the center). In the event that circumstances do not allow it, the evaluation will be carried out following the instructions established by the corresponding university institution (Rector or Dean of the Faculty).

For international students who have returned to their home countries due to the alert generated by COVID-19, the necessary coordination mechanisms and measures will be articulated with their home universities so that they can carry out the evaluation.

\* The changes introduced must not alter the expected skills or learning outcomes.

### **Ethical code**

All students must adhere to the following code of conduct:

- The answers to the proposed works and exams must be own work, unless other criteria are specifically established.
- Activities that dishonestly improve their results or positively or negatively affect the results of other students should not be performed.
- There should be no cheating, plagiarism, improper or illegal use of technology.

Failure to comply with these conditions in any of the tests carried out will imply a rating of zero in the corresponding assessment call.

### **Changes introduced in the attending hours**

In order to ensure student attention, the tools that the university has made available to teachers will be used for their development: Microsoft Teams, Virtual Campus and email. The schedules of the tutorials that are carried out with Microsoft Teams will be agreed with the students so that they do not coincide with their online teaching.
